

ADMINISTRATIVE NOTES

Newsletter of the Federal Depository Library Program

Vol. 11, no. 4

GP 3.16/3-2:11/4

February 15, 1990

January 19, 1990

Dear Depository Librarian:

The U.S. Geological Survey (USGS) has recently apprised the Library Programs Service (LPS) of an ongoing problem with publications by a former USGS employee, Robert L. Houghton. (For related information see *Administrative Notes*, v. 10, no. 16, 8/7/89, pp. 15-16.) I am enclosing a letter from the issuing agency's Chief Hydrologist as well as a three-page list of the disclaimed publications.

I am requesting that you immediately withdraw these publications from your library collection, and destroy them by any means that will prevent disclosure of their contents.

Thank you for your cooperation and prompt attention to this matter.

Sincerely,

Donald E. Fossedal

Recipients of U.S. Geological Survey Publications

Dear Recipients:

A former employee of the U.S. Geological Survey (USGS), Robert L. Houghton, is known to have falsified data related to his work as a hydrologist with the USGS's North Dakota District office. A USGS review of Professional Paper 1340 published in 1987, for which Mr. Houghton was the principal author, revealed that the report had serious technical errors and that it contained fraudulent data. Some 1,600 recipients of Professional Paper 1340 received written notice from the USGS in June 1989 that the report was flawed and should be destroyed immediately.

Mr. Houghton is the principal author of numerous other publications that relate to the work he did in North Dakota. After reviewing these publications, senior USGS officials concluded that some of the information contained in several of the publications could not be validated positively. The position of the USGS, therefore, is to disclaim all of the publications, rather than to risk the propagation of possibly falsified data and technical findings. In no way does this action reflect on any authors other than Mr. Houghton.

The USGS disclaims the 28 publications referenced on the enclosed list. If you, your library, or office has a copy of any of these publications, please destroy them. Thank you for your attention to this matter.

Sincerely yours,

A handwritten signature in black ink.

Philip Cohen
Chief Hydrologist

Enclosure

Depository Operations, Part 1

This is the first in a series of articles that will address the basic responsibilities of all Federal Depository Libraries. Future articles will cover public access, bibliographic control, collection development and other areas of depository operations that are of interest to the library community.

Rights and Responsibilities

All Federal Depository Libraries have certain rights and responsibilities. While Chapter 19 of Title 44 U.S.C., provides the legal framework of the depository library program, additional guidance concerning the rights and responsibilities of Federal Depository libraries is provided to documents librarians in the **GPO Instructions** binder. This binder is distributed to every depository.

Many librarians are still confused as to the difference between the three publications found in this binder. The Instructions to Depository Libraries (divided into chapters with separate tabs for exhibits and appendices) are the rules and regulations of the Federal Depository Library Program. The Guidelines For The Depository Library System are comprised of recommended levels of conduct for depositories. The Federal Depository Library Manual (divided into sections) supplements and expands on the Instructions, but, like the Guidelines, the *procedures described in the Manual are not mandatory*. Both the Manual and Guidelines were developed by the Depository Library Council.

As the Instructions to Depository Libraries are mandatory rules, depositories that do not follow the Instructions will fail at least one category of the GPO depository inspection report. Depositories that follow the Instructions and also conform to the Guidelines and Manual, in effect going beyond the mandatory requirements, are rated as "Good" or even "Excellent" in the appropriate category of the inspection report form.

Years ago, inspection reports reflected "grade inflation;" over half of the ratings given at any one time were "excellent." These ratings may have made many library directors happy, but they were ultimately self defeating because depositories with legitimate needs were classed as "excellent" by Washington officials. As the Instructions have become more comprehensive, ratings based on the Instructions have become a more accurate reflection (albeit at the cost of lower ratings) of current conditions found at the depository.

For this reason, GPO now sends a booklet describing the inspection process to all depositories prior to their inspection. Look for this booklet to be reproduced as Section 15 in the soon to be issued transmittal # 2 of the Federal Depository Library

Manual. The time to review all of these publications is now. Don't wait until an inspection is scheduled to study these publications. If you have any questions and/or comments concerning these publications, please do not hesitate to call or write the Chief Inspector at GPO.

Minimal Level Cataloging Proposed for Some Documents

The Library Programs Service has developed a proposal for performing minimal level cataloging on some categories of documents, in order to deal with a rapidly increasing backlog. The proposal was sent to the Chair of the Depository Library Council, Ridley R. Kessler, Jr., in December. Mr. Kessler has asked that the complete proposal be reprinted in *Administrative Notes*. The letter and attachment appear in the following pages.

IN A WORLD THAT'S

December 28, 1989

Mr. Ridley R. Kessler, Jr.
Chair, Depository Library Council.
Federal Documents Librarian
BA/SS Department-Documents
CB# 3912 Davis Library
University of North Carolina at
Chapel Hill
Chapel Hill, NC 27599

Dear Ridley:

Early in 1989 LPS requested advice from the Depository Library Council (DLC) concerning the cataloging priority system in place at LPS since 1983. Implicit in this request for advice was the understanding that LPS lacked sufficient resources to provide comprehensive and timely cataloging for all of the publications in the Depository Library Program. The response to this request for advice was received in late September:

The DLC recommends that the cataloging of government publications remain in the same order as the existing cataloging priority system which was endorsed by the Council at the Spring 1983 meeting.

The Council would further recommend that every effort be made by the GPO to give priority to the cataloging of all government publications ... so that bibliographic control can take place in a timely manner.

The cataloging priority system endorsed by the DLC in 1983 and 1989 subdivides government publications into eight categories, the lowest two of which are technical report literature and publications not distributed to depository libraries. Despite the significant improvements in the Cataloging Branch staffing which are now taking place, cataloging the publications in these

two categories will remain a practical impossibility. Of the current cataloging backlog of 12,100 publications, an estimated 65% is comprised of category seven and eight publications, including over 7,000 technical reports.

To improve this situation, LPS proposes to implement a minimal level cataloging program for low priority publications. Minimal level cataloging (MLC) omits some of the data elements and complex name authority procedures which LPS employs in the rest of its cataloging, and consequently MLC records are quicker and less expensive to prepare. MLC is a mechanism employed other national-level cataloging institutions, including the Library of Congress and the National Library of Medicine, to provide a measure of bibliographic control to publications which would otherwise not be cataloged. LPS use of MLC would allow us to provide our users with timely and reasonably comprehensive cataloging for publications which LPS is presently unable to catalog.

The MLC effort would meet or exceed all applicable national standards and network guidelines. Specifically, LPS' application of MLC would be based on the standards for cataloging at the first level of description as defined in the Anglo-American Cataloging Rules, 2nd revised edition (AACR2), and the cataloging "Level K" requirements specified in OCLC's Bibliographic Input Standards. In order maximize the potential productivity gain, LPS MLC will not include most data described as optional in the above standards documents, but will include additional data of specific interest to the government documents user community; e.g., GPO sales information, depository distribution information, an entry for the issuing agency of government, etc. LPS would eventually apply MLC to all publication formats which fall into priority categories seven and eight, including serials and maps, although the initial implementation would cover only monographs. LPS would retain the discretion to provide full level cataloging to any publications deemed to be of significant public interest, regardless of the priority system. MLC records will be clearly labelled as such in all output products for ready identification by users. LPS will avoid replacing full level member-input records on the OCLC data base with a GPO MLC record. Enclosed for your information is a detailed description of our MLC implementation plan for monographic (books format) publications.

The MLC proposal embodies numerous benefits, both for LPS and for the library community, while at the same time, the downside is minimal. Depository libraries and other users of government publications would benefit from having bibliographic access to types of material for which LPS cataloging is not presently available. This would save those libraries substantial processing costs by reducing the necessity for in-house efforts to provide access to government information. The major benefits for LPS are increased cataloging productivity, improved compliance with Title 44, U.S. Code, and a reduction of the cataloging backlog. The most negative aspect of this proposal is

that the MLC records would not be as comprehensive and authoritative as the rest of LPS' cataloging. However, considering the growing reliance of the user community on our cataloging, LPS believes the MLC proposal represents the most realistic balance of the often-conflicting demands of timeliness and comprehensiveness.

LPS requests that the Depository Library Council consider the MLC proposal, and advise me of your position by March 1, 1990. Should Council determine this proposal to be unacceptable, I would welcome alternative suggestions which would permit LPS to achieve similar improvements in bibliographic control, while still considering the existing constraints on resources. Should you wish to discuss the details of the MLC proposal, please telephone Mr. Gil Baldwin, Chief of the Cataloging Branch, on (202) 275-1121.

Sincerely,

MARK SCULLY
Director, Library Programs Service

Enclosure

Level K Elements for Monographs

(Adapted from OCLC's *Bibliographic Input Standards*, 3rd ed., 1985)

1. Fixed field requirements are the same as Level I, except that the following optional fixed fields are not used: cont, illus, indx, int lvl, and M/F/B.

The encoding level (enc lvl) must be coded **K**.

2. Variable Fields:

Tag	Field Name	Status	GPO Practice
007	Physical description fixed field (microforms)	O	GPO omits
010	LC card no.	R	
020	ISBN	R	GPO uses subfields a, z, & c as needed.
027	Standard Technical Report Number	O	GPO omits
034	Coded mathematical data	O	GPO omits
037	Stock number	O	GPO uses subfields a & b for GPO sales publications only.
040	Cataloging source	M	
043	Geographic area codes	O	GPO omits
049	Local holdings	M	Default library code is system-supplied.
052	Geographic area code	O	GPO omits
074	GPO item number	O	GPO considers mandatory.
086	GPO classification number	R	GPO considers mandatory.
088	Report number	O	GPO omits
099	Local free text call number	O	Mandatory for MoCat processing.
1XX	Main entry	R	GPO uses when required by AACR2; all headings should be confirmed in online authority file. Corporate or conference headings not in file must be established. Personal names may be used in AACR2-compatible format without NACO work.
240	Uniform title	O	GPO omits

245	Title statement	M	Use subfields a, b, c, n, & p as needed.
250	Edition statement	R	GPO uses subfield a only.
255	Mathematical data area	R	For atlases only.
260	Imprint	M	GPO uses subfields a, b, & c.
300	Physical description	M	GPO uses subfield a only.
440	Series statement, title (traced)	O	GPO omits
490	Series statement, not traced or traced differently	O	GPO omits
5XX	Notes	O -	Nearly all notes are optional for level K. GPO will omit most notes, except those relative to depository distribution format or shipping list information.
505	Contents note	O	GPO will include.
513	Type of report and period covered	O	GPO omits
533	Photoreproduction note	R	Use for items not originally published as microforms.
536	Funding information note	O	GPO omits
590	Local note	O	GPO uses for all cataloging.
6XX	Subject added entries	O	Subjects are optional for level K, but OCLC urges use of at least one subject added entry. GPO will provide at least one subject added entry, but new headings will not be established for level K records.
7XX	Added entries	O	Added entries are optional except when title is main entry; all headings should be confirmed in online authority file. Corporate or conference headings not in file must be established. Personal names may be used in AACR2-compatible format without NACO work. Make an a.e. for the issuing agency unless used as the main entry. Do not make an a.e. for contracting organizations.
830	Series added entry, uniform title	O	GPO omits

Key to status codes:

M = Mandatory; R = Required if applicable or readily available; O = Optional

Metrodocs Guides for Libraries

Metrodocs is an informal library cooperative in the Oklahoma City, Oklahoma metropolitan area that consist now of eight depository libraries. In addition to the publications that were previously noted in the April, 1988 *Administrative Notes* (Vol. 9, no. 6), we have produced two further guides. If you would like to receive a copy of one or both of them, send your requests to Metrodocs, c/o Steve Beleu, Oklahoma Department of Libraries, U.S. Documents Division, 200 N.E. 18th Street, Oklahoma City, OK 73105-3298. They are free for the asking.

Metrodocs Monograph Two Model Acts and Regulations By Johnese Petty, Oklahoma Department of Libraries. 1989. 12p.

This describes proposed laws and regulations drafted for consideration by state legislatures. Many of the citations are to model acts and regulations drafted by U.S. government agencies and published as U.S. government publications, or to model acts and regulations reprinted in U.S. government publications.

Metrodocs Monograph Three Guide to Codes, Handbooks and Standards Publicly Available in Oklahoma Libraries By Jimmie Lee, University of Oklahoma Engineering Library. 1989. 22p.

This describes standards and specifications for engineers, electricians, Federal job contractors, etc. Many of them are U.S. government publications.

Submitted by Steve Beleu
U.S. Regional Depository Librarian
The Oklahoma Department of Libraries
